

**More speed.  
More Visibility. Less damage.**

# The new blue color is only the beginning.

Cascade's next generation Multiple Load Handlers are engineered to deliver precisely what you need to move more loads faster, minimize damage and stay competitive.

Our Multiple Load Handlers will revolutionize the way you work. Cascade's global engineering team started from the ground up, creating an entirely new and superior product built to help you perform in real working conditions and meet the demanding applications throughout the material handling industry. You can handle a single pallet, or spread the forks hydraulically to lift, carry and sideshift multiple pallets side by side.

Interchangeable forks can be rotated for increased life

\*Shown with optional parabolic fork heel.  
\*Load Backrests configuration customizable to best suit your application.

## Visibly Superior

### Clearer line of sight

- Large visibility window without hosing or valves gives drivers the clear sight lines they need to approach loads quickly and avoid damage
- Arm bars positioned for better functional and perceived line of sight
- Compact height improves "over the top" visibility for ground pick-up

## The Clear Choice

### Faster service

- Easy-to-service hydraulic cylinders enable quick servicing
- Interchangeable forks can be rotated for increased life

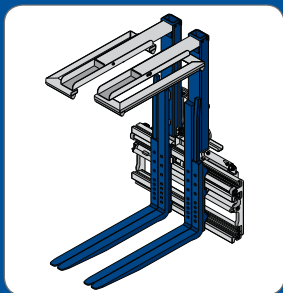

### Longer service life

- In tests, our product lasted 2.5x longer than the previous industry standard – over time, that level of durability translates into a great value
- Full-length, fully enclosed UHMW bearings provide maximum support, reducing wear on bearing surface
- Pin mounted inner forks for optimal strength and better fork movement
- Low cost service components

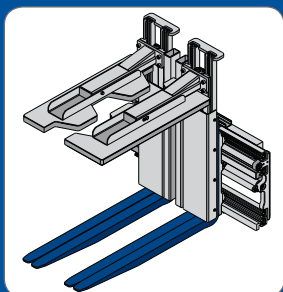

### More flexibility

- Load backrest can be ordered in different configurations for handling different kinds of loads
- Full line of Multiple Load Handlers can handle from one to six loads
- Additional options include various fork lengths, load stabilizers and extender models

# Whatever the application, we can handle it.

Single-Double with Load Stabilizer for single high stacks

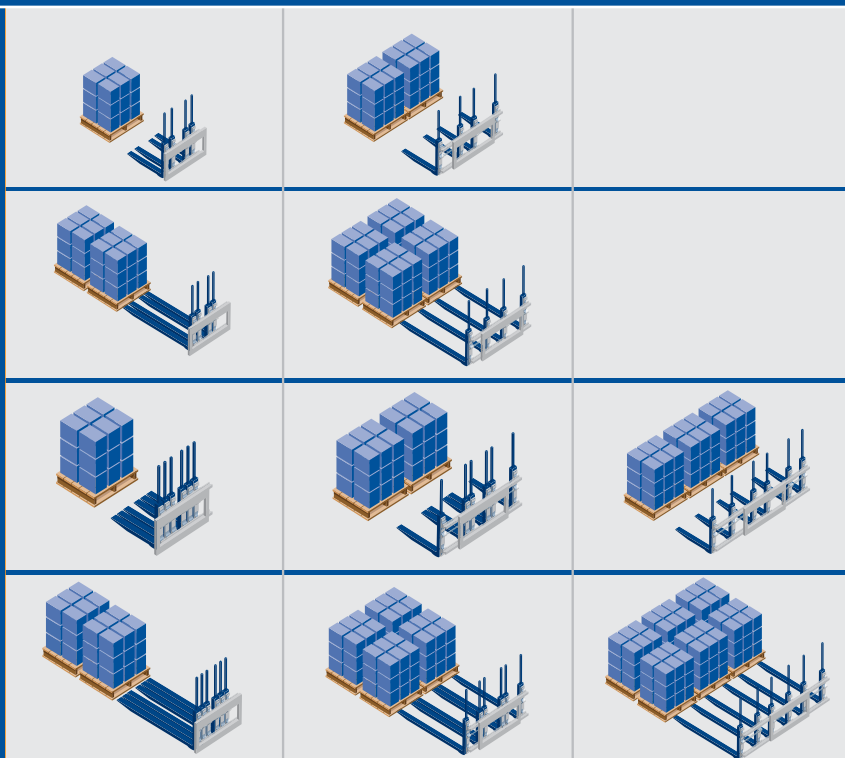

Single-Double with Load Hold-Down for double high stacks

Single-Double Pallet Handler  
Model FDS • 1-2 Pallets

Single-Double Long Forks  
Model FQS • 2-4 Pallets

Single-Double-Triple Pallet Handler  
Model FTS • 1-2-3 Pallets

Single-Double-Triple Long Forks  
Model FZS • 2-4-6 Pallets

*Buying Cascade means connecting to global resources and unmatched service, support and expertise.*

*Cascade's engineering department has more experienced engineers than any other company in the industry. Let their expertise help you.*

*Our knowledgeable sales team is always ready to help our customers when buying, and after the sale.*

*Cascade's Multiple Load Handlers are so versatile they are used across many industries and in various settings.*

*Beverage Industry*

*Food Producing Industry*

*Ports and Logistics*
